Front End Developer

EDUCATION

Jain (Deemed-to-be-University)

Master of Computer Applications in Full Stack Development

Bangalore, KA

Aug. 2023 – Present

G H Raisonni Institute of Engineering and Technology

Bachelor of Commerce in Computer Applications

Nagpur, MH

Aug. 2020 – Jul. 2023

- Major in Computer Science; Minor in Accounting
- CGPA: 8.83/10.0
- Relevant Coursework: Web Development, Fundamentals of Web Design, Operating Systems, Management of System Information, Basic Algorithms, Software Development

PROJECTS

News Homepage

Oct. 2023 – Dec. 2023

GitHub link: <https://github.com/Namnika/News-Homepage/>

- Deployed a single-page React application using 2 REST APIs, a grid-structure layout, mobile-first workflow, handled AJAX injections and bad routes
- Featured with randomly sorted popular and trending headlines, accessed to 25+ languages, categories, and countries, and clicking on nav links helped to get updated news
- Invented a play/pause audio button of 0.5 stability AI-powered text-to-speech recognition system with a 0.75 similarity boost
- Increased by 85% consistent and cohesive visual design, text hover with integrated style classes
- Tested with Jest and RTL and achieved 80% coverage report, improved 75% speed performance

Secret Authentication

Sep. 2022 – Oct. 2022

GitHub link: <https://github.com/Namnika/SecretAuthApp/>

- Developed a responsive multiple-page application frontend with React connected to the backend web framework Express
- Implemented 100% secure signup/sign-in options integrated with Google OAuth, Twitter, and GitHub
- Enhanced user experience and increased registration rates by 90% and keeps accounts safe
- Handled asynchronous loading secrets for 2000ms after submitting a secret

To-Do List

Aug. 2022 – Sep. 2022

GitHub link: <https://github.com/Namnika/ToDoApp/>

- Generated a list of to-do items in bullet point format for easy distinction
- Designed interface with minimal UI/UX initiated by React, enhanced with a small add button and hover text deleting features
- Built for 20+ notes, such as daily basis, academic, etc.

Keeper

Aug. 2022 – Aug. 2022

GitHub link: <https://github.com/Namnika/KeeperApp/>

- Accelerated by 70% notes-taking system with a grid-like structured note consisting of a Black Bold Title and Light Description giving an innovative summary with a bin delete button
- Expanded customized title input section and a description section by clicking on the plus icon button
- Programmed a Single Page React-based Web application with a diagonal-shape texture background
